

README

如何为scala项目做jar包

编写 MANIFEST.MF

```
Main-Class: me.tanglizi.lexer.LexerScanner  
Class-Path: scala-library-2.13.0.jar
```

打包：

```
cd lexical-scanner/src/main/scala/  
scalac me/tanglizi/lexer/LexerScanner.scala  
me/tanglizi/lexer/type/StateType.scala me/tanglizi/lexer/type/TokenType.scala  
jar -cfm lexer.jar MANIFEST.MF .
```

如何运行该jar包

注意当前目录下包含 scala-library-2.13.0.jar 作为依赖文件

```
java -jar lexer.jar testcase/custom-test1.txt out.txt err.txt
```
